Subject: 2017 MODEL YEAR BUS VALUES

Kalen 860-388-6782

To Whom it May Concern:

The following prices, in our opinion, represent average fair market value for school buses in good condition. All currently manufactured buses, whether they are Blue Bird, or International, are very close in price in the used market, and are represented in the price ranges listed below. Blue Bird TCs and All Americans are valued slightly higher for newer buses and about the same as the others as they approach 10 years old.

The price ranges reflect differences in equipment, such as automatic transmission, air brakes, etc. and mileage considerations. These prices are based on diesel engine buses with automatic transmissions.

★ Also, as a general guideline "Type II" (14,500 lb GVW or less) school bus values are approximately 60% of the above stated values. If wheel chair lift equipped, add \$2,000 to \$2,500 to the multiplied figure.
